

DOCTORS TO YOUR DOOR SENIOR LIVING

CARE & TREATMENT AT AN INDEPENDENT OR ASSISTED LIVING COMMUNITY

Seniors and disabled are helped to live more independently, comfortably and safer in their private residence, in independent living or assisted living facilities. Our reliable caring staff restores ones self-confidence making life more enjoyable.

Supervising wellness services for your residents is valuable and makes senior living at your community or your comfort care home the best choice for the senior or disabled. We understand that making the decision to use a licensed medical doctor is an important decision. We make sure that each medical team who visit your facility always check in first with your Caregiver to ensure that together we identify the needs of your residents.

We make it convenient by bringing the experience and professionalism of a physician who makes house calls. We bring a medical team who are qualified and capable to draw blood, provide non-emergency care, and evaluate a patients needs at your home or community.

If the patient does not have a preference, we will welcome the opportunity to work with your preferred providers. Some families are more involved than others. We are always available for consult but must be respectful of the national HIPAA privacy policy.

Our Assisted Living at Home program represents a new paradigm allowing people to age-in-place; be assisted while offering peace of mind to their adult children, family members or responsible parties. It is a true comprehensive model of care that offers a practical alternative to the "Institutionalized Nursing Home" care. Doctors to your Door assists those seniors and adults affected by Alzheimers disease and other dementias, Parkinsons and other neurological disorders and mental illnesses to live independent and meaningful lives. We bring a team of experts in aging, physicians, physical therapists, occupational therapist, social workers, registered nurses and wellness, together with care providers trained in specific behavioral interventions, to enhance our clients' quality of life.
